

# AQUAMATION

The gentle, eco-friendly alternative to flame cremation and burial.

Water is NOT FIRE

# AQUAMATION

A flameless process that uses water instead of fire

A gentle and respectful option

Returns 20% more ash remains to the family

Uses 90% less energy than cremation

No direct emissions of harmful greenhouse gases or mercury

1/10<sup>th</sup> of the environmental impact of flame-based cremation

5106 North Harrison

Shawnee, OK 74804

## A CHERISHED LIFE

We're here to help you explore your options before and after Aquamation. Once your loved one comes into our care, our artists can capture an imprint of your pet's paw or claws. For your tiniest loved ones including fish and reptiles, we can capture an imprint of the fin or tail. Many families also like to have a hair or feather clipping.

We'll return your loved one to you in an urn or scattering tube. The ashes are safe to spread or bury in a special place or garden. Our process also leaves you with many options to keep your loved one near. Keepsakes like jewelry, stones, and memory glass can be made at any time.

## FAMILIES HAVE EXPRESSED

- ◆ They prefer a process that does not use fire or flame.
- ◆ They prefer receiving 20% more of their loved ones' ash remains.
- ◆ They believe this to be a gentle option.
- ◆ They value the decreased environmental impact of the process.
- ◆ They love the different options available for memorialization.
